

# Why Avid?

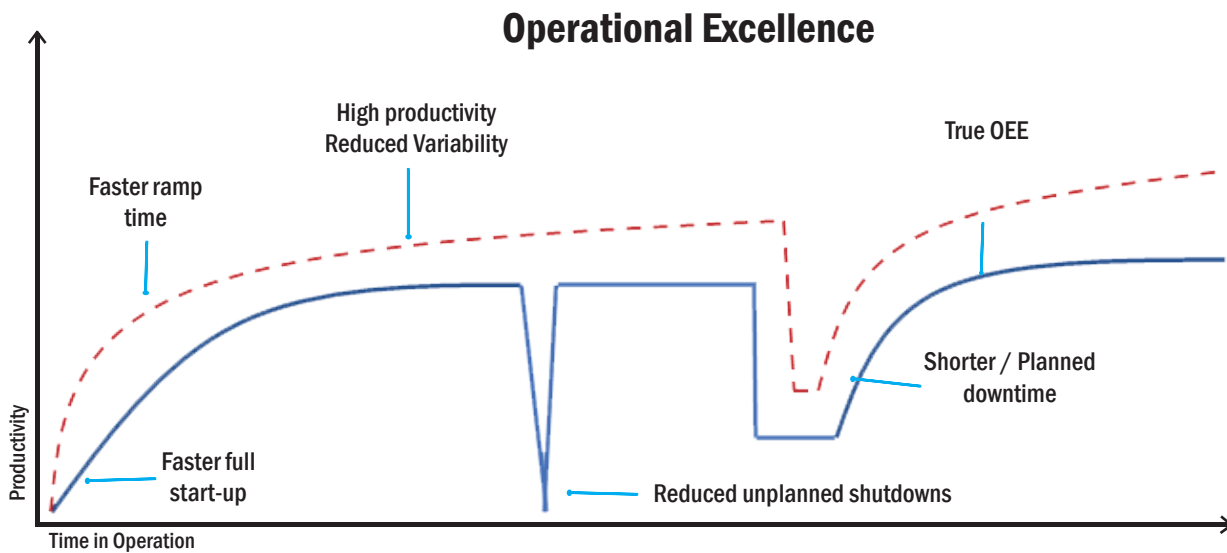

We have one focus – to help you run better. Although Avid’s consultants may be world-class engineers, at heart we are still operators who are committed to you for the long haul.

## How is our approach different?

The difference starts with Outcome-Based Engineering (OBE). By building a partnership with our clients, we dig in to understand their needs and drive the outcomes they demand.

With Avid, you will run better.

**AUTOMATION    INFORMATION    DESIGN    MANAGED SERVICES**

#### Risk Management

Avid’s project execution brings operations online in a timely and cost effective manner by using scalable and reusable tools that minimize variance

#### Operational Continuity

Avid ensures operational continuity for our partner industries that face an aging workforce and a shortage of new talent

#### Production Visibility

Avid provides instantaneous access to your operational data allowing you to make fast decisions anytime, anywhere

#### Process Expertise

The Avid team consists of experts in Life Sciences, Chemical, Pulp & Paper, and Discrete Manufacturing with a deep understanding of the industry drivers and regulations affecting **all** of our clients

# IloT and Industry 4.0...

## IT/OT Convergence

Systems boundaries are increasingly blurring across all ISA 95 layers. Simplified bus technologies and open architecture allow systems to be designed for greater product customization, for more agile production decisions, and higher availability.

## Secure Operations

Not even manufacturing is safe from hacker attacks. As a result, Avid has developed a well defined, intentional cybersecurity approach to protect your operations.

## Process Optimization

Avid unlocks value from existing assets by combining hardware expertise with process proficiency.

Every industry uses buzz words to drive change. IloT and Industry 4.0 are no different - they mean technology must work for you, not against you. Avid connects and optimizes your enterprise to put information in your hands when you need it using engineered solutions that lower risk, increase productivity, and ultimately drive business outcomes.

With Avid, you **will** run better.

## Avid IloT Maturity Model
