LIFE SCIENCES

When a new product is the driver for a new control system, every day of waiting for system completion is a day that patients go without treatment and a day with lost revenue. With us as your system integration partner, you receive solid experience in streamlining your project, resulting in a smooth and efficient implementation.

Smart about cGMP Compliance - In the transition from paper to digital record-keeping, we work to ensure compliance to standards without compromising secure and reliable records.

Smart About Electronic Batch Records - Many fear vulnerability and uncertainty along the path to EBR. With our in-depth knowledge and experience, the path will lead to improved compliance, shorter quality review cycles, reduced product loss, and potentially decreased batch cycle times.

Smart about Priorities - Not all risks are equal. We can work with you to focus on the steps in your process that carry the highest risks and design solutions to minimize those risks.

Life Sciences Applications

Fluid Bed Dryers

Electronic Batch Records

CIP / SIP

Formulation and Filling

Lyophilizers

Product Milling

Test Documents

Validation Execution

USP / WFI

Solution Delivery

Biotechnology Applications

Environmental Monitoring

Data Historian

Blenders and Fitz Mills

Packaging & Inspection

Film Coating

Electronic Work Flow

Ultrafiltration Automation

Representative Clients

Alnylam

Eisai

Hospira

Baxter Healthcare

Fresenius Kabi

Novo Nordisk

Biogen

GlaxoSmithKline

Teva Pharmaceuticals

bioMerieux

Grifols

United Therapeutics
